

Let's identify financial opportunities for more intensive sustainable renovation of buildings

Thursday, 24.10.2024, 9.00 - 15.30

Hall A, Chamber of Commerce and Industry of Slovenia, Dimičeva 13, Ljubljana

1st Slovenian National Round Table RENOINVEST

As part of the RENOINVEST activity, which focuses on promoting the energy renovation of the building stock in Slovenia, we invite you to join us for an event on **24 October 2024** to explore the challenges and opportunities in the field of energy renovation, drawing on the experience of projects that have already been implemented.

We will focus on identifying the key barriers slowing down the implementation of renovations and present good practices that could help us to achieve the green transition goals faster. In addition, we will explore different financial instruments and models that could be used to incentivise building owners to renovate and make the most of the funds available to us at national level.

The event will also present the findings of the thematic meetings organised so far in the framework of the project, as well as the key objectives that have emerged from these discussions.

The event is aimed at energy renovation professionals, financial institutions, policy makers, property owners, public sector representatives and all those who want to contribute to promoting sustainable development.

We look forward to your participation and to constructive discussions that will contribute to finding effective solutions for energy renewal and the green transition.

The event is free of charge. [Registration is required.](#)

We reserve the right to make minor changes to the programme.

Co-organised by the SLOVENIA CHAMBER OF COMMERCE and the SLOVENIA INSTITUTE FOR CONSTRUCTION
